

Resources for 2011 NACD Poster Contest

Forests for People – More Than You Can Imagine!

Posters can also use the theme: “Forest for People”.

We want to connect people to the forest whether they have one in their back yard, in their state or no forests at all. We all have a connection to the trees in the forest that provide wood for our homes, furniture or cork for the center of our baseballs. We can thank trees that help clean the air we breathe. Trees play an important part in the lives of many farmers across the nation, for food we eat, how forests are managed and products we received from them. Forests are great to hike in as well as watching wildlife and birds. There is a lot to learn about forests!

Additional information will be on the NACD website Forestry education page later in 2010.
