Watersheds can have a big impact on the water we drink.

We all live in a watershed.
We all need clean water to drink. It is very important to take good care of our watersheds.

We all live on land. The way we treat the land in our watersheds can have a big impact on the water we drink.

Locate your local conservation district and see how you can be involved in their watershed projects. Visit: http://www.nacdnet.org/general-resources/conservation-district-directory/

Learn more about your local watershed by visiting: http://www.epa.gov/mywaterway
