Step-by-Step: Logging into your NACD Account

1. To create an account or reset your password, click on the “Forgot Password?” link. Please do NOT click on the “create an account” link. Doing so will not tie your organization’s information to your NACD login information, which is a necessary step.

2. On the “Forgot Password?” page, enter the email address associated with the account and click “Send Recovery Email.”

3. Click the first link in the email to set up your profile and password. Make sure you select an organizational account rather than an individual account, and you must fill out the fields for “First Name” and “Last Name.”
