Now what???
Connection + Capacity
Messaging & Testimonials

Think of all the staff, supervisors, and cooperators who have been involved with CDs across our state — that’s a lot of people who can help share the story of our work. Here are resources to help us speak in a strong, unified voice about the value of CDs and voluntary conservation.

Messaging

- **Conservation District Key Messages** (PDF): Statements describing the unique value and purpose of conservation districts. They address three questions: 1) What are conservation districts? 2) What do conservation districts do? and 3) Why are conservation districts important?

- **Elevator Pitch and Word Bank for Describing Conservation Districts of Washington State** (PDF): Ever wish you had an under 30-second description of conservation districts in your back pocket? Use this “starter” elevator pitch and word bank to deliver a concise, impactful answer the next time someone asks, “So, what’s a conservation district?”
plagiarism
/'pläje rizem/
The practice of taking and using someone else's work or ideas.
plagiarism
/ˈplæje rizəm/

The practice of taking and using someone else’s work or ideas.
Branding

Consistent use of visual elements will help us amplify and project a more recognizable identity of conservation districts in our state. Here are some resources to help us do that.

Branding Basics

- **Branding Guidelines**: Instruction on how to use branding products in this toolkit, including key messages, logos, colors, and fonts (typeface). Please review this document.

- **Color Palette**: Colors to use when designing materials consistent with the CD logo and brand.

Logos
Media & Events

Seeking media coverage and/or planning an event? Your fellow conservation districts helped create these templates and resources to get you started!

Media Relations

- Event media release template (Word). View an example of an event media release.
- Story media release template (Word). View an example of a story media release.
- Media release checklist (PDF): Suggested "best practices" for getting your release published

Event Planning

- Event planning timeline (PDF): Suggested timeline and activities to plan a successful event
CD Event Planning Checklist

6-8 WEEKS OUT:

- Invites distinguished guests: If you’d like any elected officials or tribal leaders to attend, send them a letter of invitation, followed by a personal phone call to confirm whether or not they’ll attend. If the answer is yes, send a confirmation letter.
- Publish your event on online calendars: Many places offer free, online community events calendars. Check your local newspaper, visitor bureau or chamber of commerce, journal of business, and Northwest Public Radio and local public broadcasting website(s).
- Identify partners for your event and assign tasks: Invite partner agencies as well as community groups to be part of your event.
- Host a logo contest at local schools: Present the theme for the event to the students and let them help design a logo for the event outreach materials.

4 WEEKS OUT:

- Invites the media: Send an invitation to media, being sure to include the “what, when, where, why, and who” of your event. This may be done via email, keeping text to no more than two paragraphs. Follow-up a few days later with a phone call.
- Start promoting on social media: Begin creating posts on Facebook, Twitter, etc a couple times a week about your event or an element of the event. Consider creating a Facebook event. Ask partners and neighboring CD’s to share your event on their social media and/or newsletter.
- Submit an event press release: Send a short press release to media about the event. Depending on the event/community, this may be done 2-3 weeks before the event. An event press release template and example is available from the conservation district Marketing Tool on the SCC website.
- Promote event in your and partner newsletters
- If having refreshments/BBQ: Plan menu. Contact local businesses to sponsor event by donating food.

2 WEEKS OUT:

- Develop talking points: If you’ve asked elected officials or partners to speak at your event, be ready answer a question for talking points.
- Arrange for a photographer and note-taker: Decide who will be responsible for taking photos and notes during the event and make sure they’re able to attend.
- Plan site logistics: Especially if having a cleanup/work party type event. Consider volunteer safety. BBQ/refreshment area needs. Restroom facilities. Seating, shade, entertainment, giveaways.

Media and Events (media release templates, event planning, tours)

Contact: Name, Title
Tel: xxx.xxx.xxx
Email: john@district.com
Address:

Date:

FOR IMMEDIATE RELEASE

Main Title, keep it as short as possible
Subtitle Goes Here - should include hook or major selling point of the event

LOCATION – Body of press release begins here. Get to the point immediately. What is the take-away message from the story?

Second paragraph: provide details / facts that explain why the reader should care and continue reading (e.g. notable statistics/figures, tie to local issues).

Third – Last paragraphs: As concisely as possible, tell the remainder of your story, highlighting how this story impacts/benefits the audience, any ties to relevant community issues/topics, and include quotes.

About Random Conservation District

[Include a 3-4 line description of your conservation district and the unique services you provide. The last line should be: To learn more, visit www.randomcd.com, or call us at XXX-XXXX-XXXX ]
Messaging & Testimonials

Messaging and Testimonials
(elevator pitch, voluntary conservation talking points, testimonial worksheet)

Elevator Pitch
Conservation districts of Washington State partner with private landowners — who own over 50 percent of the land in our state — to voluntarily take action to keep our air, water, and soil healthy. They're community-based hubs of natural resource expertise and funding led and staffed by locals who understand the needs of landscapes and fellow community members that they serve.

Conservation District Word Bank
(words you can use to modify the "who-what-why-how" language in the elevator pitch above and/or use in other CD communication materials)

Messaging and Testimonials
(elevator pitch, voluntary conservation talking points, testimonial worksheet)

TALKING POINTS: VOLUNTARY CONSERVATION PROGRAMS

These talking points were developed at the request of conservation districts and are designed to help districts provide clear, unified messaging about voluntary / incentive conservation programs. Please feel free to tailor messages to better suit your district.

Voluntary / incentive programs engage private landowners as partners in stewardship.
- With over half the land base of Washington in private ownership, private landowners are a crucial partner in conservation.
- Incentives spark eager landowner participation, rather than triggering disputes and conflict.
- Following positive experiences with these programs, many landowners become spokespeople for conservation, generating positive social pressure to practice resource stewardship.

Voluntary / incentive programs are farm-friendly, which is good for the economy and the environment.
- The food and agriculture industry represents 13 percent of our state economy ($49 billion) and employs over 160,000 people. (http://agr-wa.gov/growprov)
- Some conservation practices are cost-prohibitive for the average farmer — small farms account for the majority of Washington agriculture, and nearly 85 percent of farms have sales under $100,000. (https://pubs.usda.gov/DisplayImage.aspx?ProductID=11362&Image=original)
- Incentives provide a business opportunity, rather than a business risk. During a time when farmers are already under threat — over the last 30 years, Washington lost over 1 million acres of farmland. (http://www.sdfw.org/wp-content/uploads/2016/01/2015-Final-Indicators-Report.pdf; p 6)
- Farmers are involved in voluntary conservation planning and implementation, ensuring that solutions keep their operation in business and take care of the environment.
- Farmland provides habitat and migration corridors for wildlife, as opposed to habitat loss and segregation that occurs with development.
- Healthy topsoil and vegetation help protect water quality by filtering pollutants from surface and ground water.

Voluntary / incentive programs are effective.
- In 2015, the US Fish and Wildlife Service determined that ESA-listing of Greater Sage-grouse is not warranted, largely due to voluntary conservation efforts implemented by federal, state, and private landowners. (https://www.fws.gov/press/releases/historic-conservation-campaign-protects-greater-sage-grouse)
- Over 1,200 acres of shellfish harvest area has been upgraded in Dungeness Bay as a result of a coordinated, voluntary effort to identify and correct sources of water pollution. (http://www.seapimgcon.com/news/33177581.html - Clallam CD lead partner in this effort)
### WORKSHEET: CAPTURING EFFECTIVE TESTIMONIALS

#### FROM LANDOWNERS AND PARTNERS

Testimonials from landowners and partner organizations can be effective ways for legislators to hear about the value and need for conservation district services. This worksheet was created at the request of districts to provide guidance on how to capture and share effective testimonials.

#### A: Getting started – what’s your story?
Before deciding what kind of testimonials your district will capture and from whom, define what story you want to tell.

**WHAT IS THE MAIN THEME OF YOUR STORY?** This can be:

- A strong “take-home message” (e.g., You don’t have to choose between supporting the environment and supporting agriculture — by investing in conservation districts, you’re ensuring the viability of both), or
- A natural resource or service theme (e.g., Expanding conservation districts’ proven-successful, voluntary services is an effective, efficient path to improve water quality)

<table>
<thead>
<tr>
<th>Theme:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

**WHO WILL TELL YOUR STORY?** Answer the following questions to identify landowners and representatives from partner entities who could be spokespeople who provide testimonials that support your theme. Think of their testimonials as paragraphs or chapters of your story that prove your identified theme.

<table>
<thead>
<tr>
<th>Identify landowner spokespeople</th>
</tr>
</thead>
<tbody>
<tr>
<td>Who have we worked with who is passionate, has a story to tell, and/or had a challenge that our CD was uniquely positioned to address? Who has more work to do (showing the unrest need)?</td>
</tr>
</tbody>
</table>

---

**Messaging and Testimonials**

(elevator pitch, voluntary conservation talking points, testimonial worksheet)
C. Getting the message across

Testimonials are most powerful when spokespeople are unscripted and explain their experience in their own words. The challenge is giving them space to be candid while still making sure they touch on the key messages of your story.

**HOW DO YOU DRAW OUT THE STORY?** Encourage spokespeople to answer key questions in their testimonials. These questions can be shared with spokespeople as suggested talking points to address in their letter, in-person meeting, or presentation, or as the questions you ask them during a video interview.

**Examples of key questions:**

1. What problem(s)/issue(s) were you experiencing that led you to contact the conservation district?
2. Had you previously tried anything else to solve the problem? If so, what?
3. Why did you choose to contact the conservation district, rather than a different entity or organization?
4. What was the result of the conservation district’s program(s)/service(s)? *(Encourage specifics. Rather than “we saw a big improvement in salmon habitat,” ask the landowner or partner to state exactly what the improvement was, such as “we witnessed salmon migrating up our stream for the first time in x years...”)*
5. How did the conservation district’s service(s) help meet your objectives for your property?
6. What word or phrase best describes your relationship with the district, and why?
7. What specific feature did you like most about working with the conservation district?
8. If someone called you and said, “Why should I support conservation districts,” what would you tell them?
9. Would you consider working with us again? If so, on what kind of project?
10. How would you describe the importance of voluntary and incentive-based conservation services and programs?
Outreach & Engagement

From tabling at events, to posting on social media, to meeting with decision-makers — conservation districts use many methods to reach a variety of audiences. These tips and resources were developed with and for CDs to make public engagement easier.

Campaigns and Outreach to Decision-Makers

- **Public Support for Conservation (PDF)**: Summary of tips from a talk by Dave Murphy - Commissioner of the Missouri Department of Conservation and chair of the campaign for a voter-approved sales tax to fund conservation - given at the WACD 2017 Annual Meeting. Tips focus on how to foster community support for conservation.

- **Tips to Engage Elected Officials and Decision Makers (PDF)**: Simple tips to help start and maintain effective relationships with key influencers of conservation district work.

Handouts/Program Fact Sheets

- **About Conservation Districts** (11x17 folded): Includes key messages about CDs and three sections to customize with your own district-specific information. Please review these step-by-step template instructions. View example of completed template (Spokane Conservation District).
Outreach
(engaging elected officials, fact sheets)

Tips to engage elected officials and decision makers

It's crucial that conservation districts engage elected officials and other decision-makers who have influence on voluntary conservation efforts. Knowing how to engage with them can feel intimidating. Here are some tips to help start and maintain effective relationships with key influencers of your work.

WHY... engage elected officials and decision makers?

- Establish trust. Give them confidence in your credibility, honesty, and ability to provide factual information.
- Demonstrate value. Ensure they recognize the vital services your CD provides to their constituents. Provide examples and testimonials of your work.
- Offer solutions. Present CDs as “can do” entities that can help them be successful.

HOW... do I engage them?

- Meet for coffee or at their office to introduce yourself and as a regular check-in.
- Invite them to tours, open houses, annual meetings, and other events (and include an invitation for them to speak).
- Subscribe to their newsletter and invite them to subscribe to yours.
- Invite them to write a guest editorial for your newsletter.
- Invite them to give a presentation at a board meeting.
- When in doubt, ask them how they would like to engage.

WHAT... should I ask and talk about?

- “What made you interested in running for office / taking this position?” (Then, talk about ways your work relates to their answer.)
- “What do you hope to accomplish in the next few years?” (Then, talk about how your CD can help them achieve their answer.)
- “How can our conservation district help you?”
- Make a personal connection — talk about shared interests, including things that aren’t work-related (e.g. growing up in the same town, shared hobbies). Research their interests ahead of time (follow their blogs and social media, talk to their staff).
- Give updates and show pictures of projects that relate to their priorities.
Outreach
(engaging elected officials, fact sheets)
Outreach
(engaging elected officials, fact sheets)
Photos and Graphics

Using photos and graphics is a great way to visually engage your audience. Washington's CD have access to hundreds of images that are free for you to use!

Photos

CD/SCC Photo gallery (hosted on Flickr): Find images of working lands, conservation, and landscapes from across Washington. Images have been contributed by conservation districts and the SCC and are available for non-commercial use by conservation districts, the Washington Association of Conservation Districts, Washington Association of District Employees, and Washington Conservation Society.

- Licensing: CDs, WACD, and WADE are granted a royalty-free license to remix, tweak, and build upon images in the gallery non-commercially. Photos may not be used to infer or imply SCC endorsement of any product, company, or position. Please do not distort the images the photos portray.

- Credit: While not required, please provide a photo credit as feasible. Suggested credit is: Photo by [photographer’s name],[entity name] (e.g. Photo by Joan Smith, Random County Conservation District]. *Note: When you click on a photo in the Flickr gallery, the photographer is listed in the photo description.

- How to submit photos: The SCC and Communications, Partnership, and Outreach (CPO) group runs an annual conservation district photo contest each year between August-September. All submissions are added to the gallery. Outside of the contest time frame, we still appreciate your photo submissions! Please email Laura Johnson if you have photos you’d like to share.

General photography tips and tricks: Find a list of simple tips, presentations, videos, and resources to help build photography skills. (List created by CD employee and photographer Andrew Phay, Whatcom Conservation District)
Photos and Graphics (galleries, icons, visual equivalents)
Visual Equivalents for Conservation Measures

Not everyone can conceive what it means to save 1.62 cubic feet of water per second. But most people understand that saving enough water per day to fill an Olympic-sized pool is a great public benefit.

Translating metrics into relatable visuals helps engage your audience and make messages about your accomplishments stick.

The tables in this document provide options for translating conservation measures into visual equivalents. Some visuals are hyperlinked—click the link to view a graphic of that image that’s available for CDs to download/modify/use in your communication materials.

### Water/Liquid Measurements

<table>
<thead>
<tr>
<th>Measurement</th>
<th>Visual Equivalent</th>

<tr>
<td>240 miles</td>
<td>Distance from WA’s northern (Canada) to southern (OR) border</td>
</tr>
<tr>
<td>360 miles</td>
<td>Distance from WA’s western (coast) to eastern (ID) border</td>
</tr>
</tbody>
</table>

### Looking for Greenhouse Gas/CO2 Emission Equivalents?

Check out the EPA Greenhouse Gas Emission Equivalencies Calculator.

### Want to Calculate How Conservation Project Investments Impact the State Economy and Job Creation?

Use the Washington Input-Output Table (updated June 2019, developed by the Office of Financial Management) to get an estimate.

Note: For most circumstances when the SCC uses this table, we use the “Simple Analysis” sheet method and enter the funding expanded into Table 1: “Output” (Column C) under “52, Waste Management/Other & Agricultural Services” (Column A). Your district may have program/service expenditures that fit better under other work sector(s)/category(ies) (Column A).

### Want More Conservation and AG-Related Graphics to Use in Your Materials?

We created a whole Digital Image/Graphics Library for conservation districts to use. Images are organized by topic area in folders and are free for CDs to use and modify in their non-commercial marketing materials.
These irrigation projects return an estimated 14.1 cubic feet of water per second to our salmon streams.

That’s enough to fill 14 Olympic-sized swimming pools per day!
Photos and Graphics

Using photos and graphics is a great way to visually engage your audience. Washington’s CD have access to hundreds of images that are free for you to use!
